ABOUT ME

I am 23 years old outgoing, confident, and a friendly young man with a lot of patience and very open-minded when it comes to the working environment. I have good academic status with a CGPA of 3.83 and extensive knowledge of PHP, JavaScript, Python, CSS and HTML. Additionally, I am well-versed in Laravel and Drupal frameworks. I am currently building web app in Laravel framework.

WORK EXPERIENCE

Bahir Dar, Ethiopia

Internship

In Bahir Dar, where I interned with Information Technologies for Development of Africa (ICT₄DA), creating a website for SANS AND PRE-ENGINEERING COORDINATION OFFICE was one of my efforts. The website is now functionally connected to Bahir Dar University's main website. Another project I created for Bahir Dar University during my internship period was a web-based legal affair tracking system in collaboration with my team members. This project saves 50% of the work and money necessary to track legal issues in Bahir Dar University.

Agri-Tech Hackathon 2022

I was one of the competitors in the Agri-Tech Hackathon 2022 at Bahir Dar University. The computation was about building a mobile and web app to facilitate the chain of suppliers to the consumer in agriculture products and solar energy.

PROJECTS

Website for SANS AND PRE-ENGINEERING COORDINATION office.

<https://bit.bdu.edu.et/sans/>

The website is build using Drupal framework for Bahira Dar University.

The website has feature to add News, Blogs, Articles and gallery with separate page for admin and user, This website is now functionally connected to Bahir Dar University's main website.

Web-based legal affair tracking system

This Web app is build using plain PHP,HTML and CSS. The users of this system have different role and should authenticate based on their roles in the system. The system has used to track legal cases in Bahir Dar University. This project saves 50% of the work and money necessary to track legal issues in Bahir Dar University.

CURRENT

Personal portfolio website

This is ongoing personal portfolio website using Laravel as a backend framework with HTML, Bootstrap and CSS In Laravel blade section.
